

The Oversight Process for the Development of a Health Innovation

This infographic presents the steps of the development of a new drug, from laboratory design to use by the public.

Health Canada is the federal agency that regulates and supervises clinical research

Health Canada has an active role in:

- protecting the rights and safety of the public
- assessing data validity and integrity
- ensuring compliance with the *Food and Drugs Act* and the *Food and Drug Regulations*, including good clinical practices

Health institutions and ethics boards, in collaboration with Health Canada, evaluate the research project to validate its compliance.
